

B & G

Instruments Inc.

FAA Repair Station No. LR4R346M

To All B&G Instruments Customers:

B&G Instruments is now extending our warranty period on all aircraft parts repaired or overhauled at our facility to 18 months/1000 hours. The warranty period for simulator parts is 3 months/1000 hours. Bench checks are not warranted.

Warranty will be voided if any of the following conditions exist:

Broken warranty seals

External damage (dented case, broken glass, etc.)

Evidence of faulty electrical inputs

Disassembly or unsealing hermetically sealed parts

Warranty covers parts and labor to replace only those parts that were replaced during any previous repair/overhaul (within the warranty period). Parts *not* replaced during previous repair/overhaul are not covered.

Thank you,

Robert Brown  
General Manager
